Subject: RE: LPRSA - 11 principles memo - quick question

Ok, its all coming back to me now. Yeah, I want to include it in the supplemental packet and am fine it with the data and plots being an appendix to the supplemental memo. What I would want is just some language in the main text of the supplemental memo linking it to the appendix. I will put a placeholder in there as I send that supplemental memo off to our internal reviewers today.

Thanks for the quick reply!

Jen, During our meeting last week you mentioned that one of the CSTAG's comment was that they never receive information on subsurface contaminants. I then asked if you were envisioning a write up similar in detail as that of the surface. You seemed to indicate that you wanted it as supplemental information. During our weekly call yesterday I brought up the question again and Diane believed the subsurface information is intended to be sort of a back pocket item/attachment or addendum.

We can write it up either way, just let up know. If inserted into the document it would go in as its own section and we would have to update figure numbers. Renumbering figures would not be too big a deal and we could cover it when we address comments.

Keegan is currently working on it. We are targeting tomorrow COB for delivery, since they are new figures we need to get them tech reviewed.

Scott F. Kirchner

Scott – In the 11 principles memo draft, principle 4, item A, you embedded a comment about how you are working up a subsurface contamination discussion.

Is the intent of that to go into the 11 principles memo OR the supplemental overview memo.

Where are you guys with that the write up of that discussion?
